

Custom Miter Release

fax to 503.692.9315

email to hfcr@hartmannforbes.com

In order to craft your mitered shades so that they may be raised to the same level, a ____"D headrail is required. Specifying a ____"D headrail will cause a ____"W gap between the two shades and will leave the mitered headrail exposed. By choosing to have the shade built on a ____"D headrail, it is understood that Hartmann&Forbes will not remake this product due to dissatisfaction of the finished product.

Please complete and submit this form to Customer Relations.

I understand that by using a headrail different than what is recommended by Hartmann&Forbes, the edges of my shade can be damaged due to stacking. I authorize my order to be crafted on the stated headrail.
