

NEWTON BLUETOOTH SETUP powered by MOTIONBLINDS

Once shades are installed, you are ready to set up the Newton Bluetooth control with your smartphone.

Step 1: Confirm the Bluetooth function on your smartphone is enabled (Bluetooth > On).

Bluetooth On

Step 2: Download the latest version of the Motionblinds Bluetooth app from the App Store (iOS) or Play Store (Android).

IOS
App Store

Android
Google Play

NOTE

There are multiple Motionblinds apps, please download the correct one. No registration or account is required for this app.

Step 3: Open the Motionblinds Bluetooth app and press the + sign to add your window covering in the app. Select the style of shade, and then find your shade using the auto detect feature.

Step 4: Once shades are added to the app homepage you can select, test and name the shades by selecting the three dots at the upper right corner of each individual shade screen.
