

SONESSE® ULTRA 30 WIREFREE

Our premium battery system is quiet and powerful with a built-in, rechargeable battery.

- RF antenna wire must be exposed, not come into contact with metal, and may need to be repositioned for optimal range.
- A 12V DC charger is included
- Batteries must be recharged before their complete discharge in order to prevent loss of shade programming due to under voltage. The suggested battery recharging cycle is once per year or when slowing shade operation is observed.

MOTOR SPECIFICATIONS

Voltage*	12V DC
Nominal Load Current*	0.8A
Sound Level**	38 dBA
RF Control Range (will vary)	60ft

*According to standards ISO 374 NF 31022 in dBA

SHADE SPECIFICATIONS

MIN Shade Width	27.5" / 698.5mm
MIN Roman Shade Headrail Depth	2" / 50.8mm
MAX Roller Shade Diameter	3.75" / 101.6mm
Approximate Lift Capacity*	17 pounds / 7.5Kg

*For reference only. Specific load capacity for all shades to be determined by Hartmann&Forbes
