

Natural Woven Shade
ROLLERFOLD™
STYLE

ROLLERFOLD™ STYLE

This innovative style combines the aesthetic beauty of a roman-fold shade with the sleek performance and child safety features of a Roller Style shade. The Rollerfold eliminates shade-body operational cords yet mimics the look of a roman shade. *(Patent Pending)*

HEADRAIL & VALANCE DETAILS

- Wrapped 2¼"D x ¾"H pine headrail standard. Headrail sizes will vary and is based on weave selection and dimensions of shade
- 6"L front valance made from shade fabric. Other valance options available
- Valance lined with translucent Liner. Sheer and blackout available
- Inside mount valance deduction ¼"W
- 6"L side returns standard on outside mount shades. Other sizes available

SHADE OPERATION

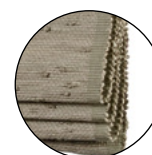

- Fabric rolls onto a heavy-duty aluminum tube. Diameter of tube based on weave selection and size of shade
- Clutch color coordinated to fabric unless otherwise specified (white, vanilla, grey, brown, black)
- Mounting brackets coordinate with clutch unless otherwise specified. If available, covers will match clutch color on outside mount shades
- Control loop approximately 75% the length of the shade. Other lengths available

SHADE DETAILS

- Three 6"L fixed folds are sewn along shade bottom. Additional folds available
- Shade fabric falls from rear of tube closest to window. Reverse roll available
- Shade fabric measures 1⅞"-1⅝" narrower than specified width to accommodate clutch, idle pin and brackets, see inside mount gaps
- Bead chain color coordinated to shade fabric unless otherwise specified, Metal Ball Chain available
- Bottom hems: Woven-to-Size Collections – handsewn tapered end oval hem
Tailored-to-Size Collections – finished round hem

Outside Mount

Fixed Folds

Shown with valance removed

Size Limitations
Max. width: 144"
Max. length: If over 84"
contact H&F

DESIGN CONSIDERATIONS

- Shades with lengths over three times the width are not recommended as they may track unevenly
- Not available with liner fabric or edge binding upgrades
- For additional sun or privacy controls, consider an Extra Density Weaving upgrade or a Dual Shade upgrade
- If specified without valance, consider Ultra Clutch upgrade for a distinct expression
- Shade back is cordless and ringless providing a clean look from window exterior

Consider an automation upgrade to eliminate controls, providing a 100% cordless shade.

BEST FOR KIDS – Best suited for use in homes or in facilities in which young children are expected to be present.
