

Natural Woven Shade

DUAL SHADE – ROMAN | ROLLER

DUAL SHADE – ROMAN | ROLLER

An independently-operated rollershade mounted behind a natural roman shade, on a shared headrail, provides flexible sunlight and privacy control. Rollershades are offered in a range of weaves and opacities giving you flexibility to control your environment.

DETAILS

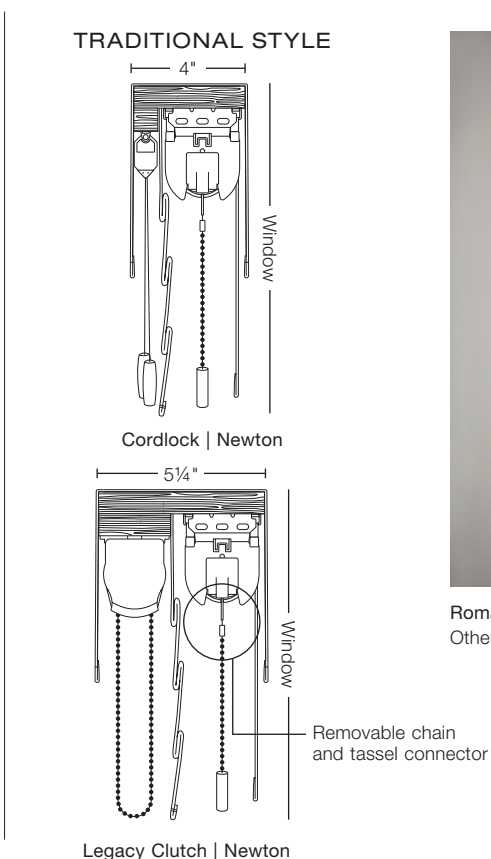

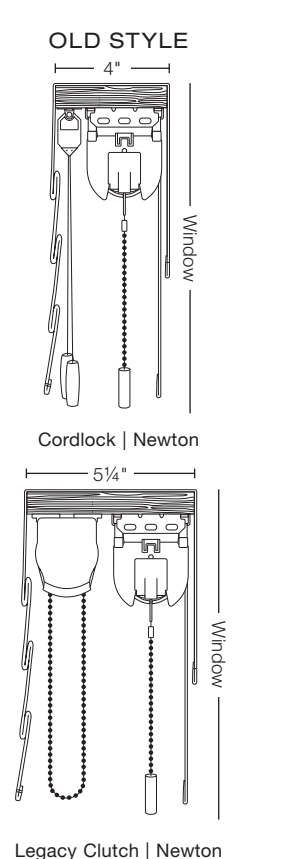

- Shades crafted to chosen style specifications and method of operation
- Fabric wrapped wood headrail. Window casement requirement dependent on fabric selection, shade size and methods of operation
- 6"L rear valance made from roman shade fabric. Some motors require 8"L
- Rollershades under 72"W are pre-attached to the headrail
- Illustrations below depict the most common configurations. For others, including automation support, contact H&F

DC DESIGN CONSIDERATIONS

- For ease of installation, shades wider than 96" need to be ordered as separate shades rather than as a Dual Shade
- Not recommended for outside mount due to projection. Order as separate inside mount roller and outside mount roman shades

Natural Roman | Performance Rollershade with Automation

Roman with Cordlock | Roller with Newton
