

Natural Woven Shade
OLD STYLE

OLD STYLE

A modern classic, this roman shade style is simple and clean with the shade fabric falling off the front of the headrail. Operating method is located behind shade fabric.

DETAILS

Headrail: Fabric wrapped wood headrail. Headrail depth based on method of operation

Valance: Inside mount – 6"L rear valance made from the shade fabric. Some motors require 8"L

Valance lined with color coordinated translucent liner for weaves with privacy level 1 or 2, see options

Outside mount – Valances not included as standard, available upon request as a front or back valance. If valance is specified, side returns will match valance length

Side Returns: Outside mount – Side returns made from the shade fabric, length dependent on method of operation

Deductions: Inside mount – $\frac{3}{8}$ "W overall deduction taken for operating clearance (WTS shades may vary $\frac{1}{8}$ "- $\frac{5}{8}$ "W)

Outside mount – no deduction taken (WTS shades may vary up to $\frac{1}{2}$ "W overall)

Lift Cords: Color coordinated lift cords draw through hand-stitched rings and child-safety shroud 

DESIGN CONSIDERATIONS

- If casement depth is limited, consider $\frac{3}{4}$ " x $\frac{3}{4}$ " or 1" x 1" headrail with cordlock
- Stacking varies when in full up position, see roman shade stacking dimensions
- Pull-cords located behind the shade, making any manual method of operation difficult to access behind inside mount shades
- To add an architectural detail consider adding an Old Style front valance
- When specifying butting shades or mounting shades between fixed objects, contact H&F for support
