SPLITVIEW™ STYLE Top-Down/Bottom-Up or Top-Down Only

The Splitview Style is ideal for rooms where you want to preserve a view, control light and maintain privacy. This roman shade operates from top-down or bottom-up.

HEADRAIL & VALANCE DETAILS

- Wrapped 1½"D x ¾"H pine headrail. Other headrail sizes available
- 6"L front valance and 4"L rear valance made from the shade fabric
- 6"L side returns standard on outside mount shades. Other sizes available
- Outside mount valances: Woven-to-Size – woven to headrail width
Tailored-to-Size – made ¾" - 1¼" wider than shade body to accommodate side returns

SHADE OPERATION

- Top-Down/Bottom-Up: Two cord-lock and pulley system; cord right operates bottom-up, cord left operates top-down
- Top-Down Only: One cord-lock and pulley system
- Pull-cord approximately 40% the length of the shade. If longer pull-cords are needed specify required length
- Two clear cord-cleats (white, silver, bronze, brass available)

SHADE DETAILS

- When shade is top-down, operating cords will be visible in open section of shade. Cords will be spaced 8"-12" apart
- Deductions: Inside mount – ⅜"W overall deduction taken for operating clearance (WTS shades may vary ⅛" - ⅝"W)
Outside mount – no deduction taken (WTS shades may vary up to ½"W overall)
- Pull-cords draw through hand-stitched rings. Cord shroud applied for child and pet safety
- Pull-cord color coordinated to shade fabric unless otherwise specified
- Bottom hems: Woven-to-Size Collections – handsewn tapered end oval hem
Tailored-to-Size Collections – finished round hem
- Handcrafted tassels. See standard chart and tassel options

Top-Down/Bottom-Up

Size Limitations
Max. width: 96"
Max. length: over 152"
contact H&F

Top-Down Only with Clutch

Size Limitations
Max. width: if over 180"
Max. length: over 152"
contact H&F

DESIGN CONSIDERATIONS

- Shades over 72"W may be heavier and more challenging to level when raising. Consider a Top-Down Only with Clutch
- When selecting a sheer open weave, order a valance upgrade or top treatment to conceal componentry
- Automation not recommended without a control system

 If lowering shades below 50% we do not recommend Splitview Style due to cord exposure.
