STRUCTURED VALANCE

STRUCTURED VALANCE

This valance features a wood silhouette frame that helps maintain the fabric's structure while still allowing light to gently filter through.

DETAILS

- Available outside mount only
- 4"D x 8"L. Custom sizes available. When placing order, specify the inside box dimensions. Overall width may vary due to wood return and weave thickness (1½" - 1¾")
- Bottom hem with internal stabilizer bar
- Unlined; sheer and translucent liners available as upgrade
Blackout liner not available

Structured Valance

DESIGN CONSIDERATIONS

- Some weaves, such as reeds, bamboo peel, etc., require railroading
- Valances wider than the shade material, including the returns, will be spliced
- Consider Extra Density Weaving on sheer open weaves
- For tall windows or shades with motors, we recommend specifying a 9"L or longer valance to conceal componentry or to maintain proper scale
- Not available in Colourweave or Soft Natural Fabric Collections
- If installing an automated shade under valance, make additional length accommodations for the ¾"H valance headrail

To finish specifying your Top Treatments, and complete your worksheet, follow this step-by-step process in the [Style Guide](#):
